History and Mission

Caidya's mission is to help bring life-changing therapies to our global community through liberated clinical research. We believe in creating innovations that improve the overall development process and help bring quality treatments to patients more quickly and effectively. Caidya began in 2003 as a software company under the brand name Clinipace, and through a series of global acquisitions and mergers became a full-service CRO.

Highlights

Caidya is a multi-therapeutic clinical research organization (CRO) serving innovators worldwide. Focused on delivery excellence and an elevated customer experience, Caidya offers a wide range of clinical services and vast therapeutic expertise, supporting its partners from pre-IND strategy, through clinical development to submission and post-marketing surveillance. Caidya leverages industry-leading and proprietary clinical technology to ensure trial transparency and data-driven decision-making. Formed in 2021 following the merger of leading CROs, dMed and Clinipace, Caidya has nearly 1700 employees in 30+ countries throughout the world.
