History and Mission

For over 30 years, **Fortrea** has been providing our customers comprehensive CRO services, bridging the gap between innovative ideas and proven therapies. Fortrea offers Phase I-IV trial management, clinical pharmacology, patient access solutions, and other enabling services. We drive healthcare innovation globally by partnering with biopharma, medical device, and diagnostic companies. Fortrea is not just a research partner but a pioneering force, delivering solutions that truly impact patients' lives.

Highlights

With 19,000+ professionals, we partner globally with emerging and large biopharma and medical device and diagnostic companies in 100+ countries, driving healthcare innovation. Our scientific rigor and trial experience navigate complex research with flexibility. As creative problem-solvers, we bridge ideas and therapies for patients, caregivers, and providers, unlocking possibilities through partnership. Our highly flexible delivery models challenge the status quo, empowering teams to deliver life-saving healthcare solutions efficiently.
